## Summary

As a Salesforce developer in a product company with one and a half years of experience, I have had the opportunity to work on diverse projects. One notable project I was involved in was the financial forecast project with Place, where I utilized my skills in Salesforce Apex and Lightning Web Components (LWC) to develop solutions and contribute to the successful implementation of the project.

In addition to the financial forecast project, I have also worked on a shopping management project, where I leveraged my Salesforce development expertise to enhance the functionality and user experience of the application.

To further expand my knowledge and stay up-to-date with the latest developments in the Salesforce ecosystem, I actively participate in Salesforce groups meetings. Additionally, I am proud to be a member of the Salesforce community, where I engage with fellow professionals and contribute to the exchange of ideas and best practices.

Overall, my experience as a Salesforce developer, combined with my proficiency in Apex, LWC, and active involvement in the Salesforce community, has equipped me with the skills and knowledge necessary to excel in delivering effective Salesforce solutions for your organization.
